SUMMARY

Senior full stack developer with 7 years building and maintaining web applications for startups and international clients, across the frontend in JavaScript, TypeScript and Vue.js and the backend in PHP, Node.js and Python. At Rabinovici & Associates I architect, develop and maintain Drupal 10 and 11 platforms end to end, lead code reviews, mentor developers and set the standards the team builds on. I work with REST APIs and API integrations daily and collaborate in English with stakeholders in the US and Europe. Available as a full-time contractor in Latin America, English C1.

SKILLS

- Languages: JavaScript (ES6+), TypeScript, Node.js, Python, PHP (7 years), SQL
- Frontend frameworks: Vue.js, Angular JS, HTML5, CSS / SASS, AJAX, Twig, GSAP
- APIs and backend: REST APIs, web service API integrations, Drupal 9/10/11 custom modules, MySQL, PostgreSQL, Firebase, Flask
- Practices: Git, code review, coding standards, mentoring developers, Playwright testing, agile sprint planning and SCRUM, agentic AI workflows for code generation, QA and deployment automation
- Analytics and CRO: GTM, GA4, VWO, Segment, Enhanced Ecommerce

EXPERIENCE

Rabinovici & Associates · Drupal Lead · Oct 2022–Present · Remote

- Lead all Drupal projects end to end, from architecture and sprint planning through development and long-term maintenance, including greenfield site builds on Drupal 10 and 11.
- Mentor developers across multiple concurrent projects, setting coding standards and Drupal best practices.
- Plan and execute new site launches, covering content modelling, custom modules, Twig theme systems and deployment.
- Introduced agentic AI workflows into project delivery, covering code generation, content migration, QA and deployment automation.
- Implement A/B testing and personalisation campaigns in VWO, improving client conversion metrics.

Rabinovici & Associates · Frontend Developer · Aug 2021–Oct 2022 · Remote

- Delivered responsive Vue.js applications and Drupal Twig components for international clients.
- Collaborated directly with international stakeholders to translate design requirements into production-ready components.
- Standardised the GTM and GA4 tagging architecture across all client accounts.

Newrona SAS · Frontend Developer · Mar 2021–Aug 2021 · Bogotá

- Integrated Firebase and RESTful micro-services into production applications.
- Developed immersive Angular JS web apps with WebGL, Three.js and 360° rendering.

Epica AI · Technical Product Manager · Jan 2020–Jul 2020 · Bogotá

- Served as the primary technical bridge between Colombia and the Belarus development team, owning the product roadmap and use-case documentation under SCRUM.

Epica AI · Web Developer & Analytics Engineer · Mar 2019–Jan 2020 · Bogotá

- Built internal JavaScript tools to automate client tagging workflows and developed web service API integrations.
- Architected GTM data layers and Enhanced Ecommerce tracking pipelines for multiple clients.

EYS Soluciones Empresariales · E-Learning Platform Developer · Apr 2018–Jan 2019 · Bogotá

- Built and configured a Moodle e-learning platform and designed interactive D3.js and Dimple.js dashboards.

EDUCATION AND CERTIFICATIONS

- Multimedia Engineering, Universidad Militar Nueva Granada, 2013–2019
- SCRUM: Certified Product Owner
- Segment: Analytics Expert · Segment: Implementation Expert
- Vue: The Complete Guide · React: The Complete Guide

PROJECTS AND COMMUNITY

- camello (2026) is an open source, local-first job search CLI for developers in Colombia and LATAM, written in TypeScript on Node.js with zero runtime dependencies. It ingests public ATS feeds and Hacker News and lets the user's own coding agent judge each posting against a local profile.
- VerifAI Check is a WhatsApp bot that fact-checks texts, links, images and voice notes for Colombian users, built on Claude with live web search and the Google Fact Check Tools API.
- LOR Stats (2020 to 2022) is a match-history and stats tracker for Legends of Runeterra built with Python, Flask and Firebase, officially associated with Riot Games, with a companion Discord bot in Python distributed via top.gg.
- Regular game jam participant since 2018, with multiple playable Unity C# prototypes and a board game project in its testing phase.
